

# Lightspeed POS DirectConnect

## OVERVIEW

In8Sync Lightspeed POS DirectConnect is a fully-featured, out-of-the-box solution to natively and seamlessly integrate a company's NetSuite applications with its Lightspeed point of sale system.

## KEY FEATURES

- Support for all item types. Stock levels by location. Bi-directional inventory transfers.
- Sync order history. Support for on-account and walk-in sales, credit memos, store credits and gift certificates.
- Generate NetSuite transactions based on payment method. Cash sale and invoice support. Optional sales orders. Support for refunds, exchanges and store credits.
- Multi-store, multi-outlet & multi-register support.
- Bi-directional syncing: real-time, on-demand & scheduled.
- No external integration platform means superior performance, simple install, minimal management and lower cost.
- Easy to install in 1 to 2 hours.
- 24/7 managed support from In8Sync.

## DIFFERENTIATORS

With In8Sync, there are no system constraints on the way you do business. Other solutions run on an external integration platform, In8Sync Lightspeed POS DirectConnect is natively built into NetSuite. This offers superior system performance, dramatically reduces the time and skill required to manage the system, and saves a lot of money.

**"There's no third-party integration platform to manage with In8Sync's solution. It works so well I hardly have to get involved."**

- Jonas Aurell  
Managing Director, Scandi Kitchen

## HOW NETSUITE IS EXTENDED

- Two-way, bi-directional syncing with the Lightspeed API
- SuiteApp bundle manages entire integration
- 1:1 mapping engine
- Fully configured within NetSuite
